Data source and methods

Incidence

Country-specific data source: Cuenca Cancer Registry, Guayaquil Cancer Registry, Loja Cancer Registry, Manabí Cancer Registry, National Cancer Registry of Tumores (Quito)

Method: Estimated from national mortality estimates by modelling, using mortality:incidence ratios derived from country-specific cancer registry data

Mortality

Country-specific data source: National (WHO)

Method: National rates projected to 2020

Prevalence

Computed using sex-, site- and age-specific incidence to 1-,3- and 5-year prevalence ratios from Nordic countries for the period (2006-2015), and scaled using Human Development Index (HDI) ratios.
